TANMAY KADLAG

Big Data Engineer | Pune, India | tanmayrkadlag@gmail.com | +91 9373791216 | LinkedIn | GitHub | Portfolio

SUMMARY

Results-driven Big Data Engineer with **4 years** at Deloitte, specializing in building scalable ETL/ELT pipelines and deploying machine learning solutions for the FMCG domain. Skilled in PySpark, Apache Spark, Scala, Python, and SQL, with strong hands-on expertise in Azure Data Factory, ADLS Gen2, Delta Lake, Databricks, and Google BigQuery. Proven ability to process **500M+ records** monthly, manage **2TB+** data pipelines, and enhance model deployment efficiency by up to **30%**.

CORE SKILLS

Data Engineering	PySpark, Apache Spark, Scala, Python, SQL
Cloud Platforms	Azure Data Factory (ADF), Databricks, Delta Lake, ADLS Gen2, GCP BigQuery
Architecture	ETL/ELT, Medallion Architecture (Bronze/Silver/Gold), CDC, Star Schema, CI/CD
ML & Analytics	Model Tuning, Retraining Pipelines, Sales Forecasting, Clustering, Power BI, Looker Studio

EXPERIENCE

Big Data Engineer May 2024 – Present
Deloitte — Technology & Transformation, Innovation Team | Pune

- Industrialised a country-wide predictive analysis pipeline on ADF; cut model deployment cycle by **30%**.
- Built ETL framework (Scala + PySpark) processing **500M+ records/month** powering Databricks Workflows ML models — reduced FMCG sales prediction errors by **15%**.
- Designed new ML model from scratch (clustering + iterative training); lifted model performance by **10%** and pipeline efficiency by **20%** via integrated retraining pipelines.
- Managed **2TB+** Delta Lake pipelines with ACID transactions, schema enforcement, and Databricks Workflows orchestration.

Analyst — Cloud Engineering Jul 2022 – May 2024
Deloitte — Cloud Engineering | Mumbai

- Preprocessed large datasets with PySpark + Scala for churn & recommendation models; improved prediction accuracy by **30%**.
- Automated Excel-based sales reporting in Scala — eliminated **30%** of manual effort across sales representative workflows.
- Optimised Power BI backend queries; improved dashboard refresh speed by **25%** for real-time model health monitoring.
- Streamlined Apache Spark ETL workflows; improved data readiness for forecasting pipelines by **40%**.

PROJECTS

FMCG Data Lakehouse Databricks · PySpark · Delta Lake · Medallion Architecture · CDC

- Built Bronze/Silver/Gold Medallion Architecture on Databricks; implemented CDC via `MERGE INTO` for upserts & deduplication — daily incremental + historical backfill loads unifying a post-merger FMCG data estate.
- Designed Star Schema Gold layer for optimised BI; integrated Databricks Genie for stakeholder self-service natural language queries.

GCP Student Placement Analytics Pipeline GCP · BigQuery · SQL · Looker Studio

- Cloud-native ELT pipeline on GCP analysing **5,000+ engineering students**; surfaced *Backlog Cliff Effect* — 1 backlog drops placement probability **94%** → **73%**; internship shows **2**× stronger salary correlation vs CGPA alone.

EDUCATION

B.Tech — Electrical & Electronics Engineering 2018 – 2022
Visvesvaraya National Institute of Technology (VNIT), Nagpur

CERTIFICATIONS

Azure AI Fundamentals (AI-900) — Microsoft Sep 2025
Machine Learning Specialization — Stanford University & DeepLearning.AI Mar 2025
Databricks Fundamentals Accreditation — Databricks Jul 2025

ACHIEVEMENTS

JENESYS 2.0 — Youth Exchange Selected to represent India in the Japan International Cooperation Center (JICE) program, fostering cross-cultural collaboration across Asia-Pacific nations. (2014)

Inter-NIT Yoga Tournament Represented VNIT Nagpur at the Inter-NIT Yoga Tournament at NIT Silchar, competing among 31 national institutes. (2019)
